Subject: Detrex Carbohydrates Statement

To whom it may concern,

Carbohydrates are biomolecules which consist of carbon, hydrogen, and oxygen atoms. They are organic compounds, which occur in foods and living tissues, and include sugar, starch, and cellulose compounds.

No carbohydrates or carbohydrate containing compounds are used by Detrex Chemicals in the manufacture or packaging of hydrochloric acid products. Likewise, carbohydrates and carbohydrate containing compounds are not used to produce the raw materials Detrex Chemicals uses to manufacture our hydrochloric acid products.

While we do not routinely test for these compounds, to the best of our knowledge we have no reason to suspect carbohydrates exist in our hydrochloric acid products. Detrex Chemicals certifies our hydrochloric acid products to be carbohydrate free to the best of our knowledge.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is written in a cursive style with a large, looped initial "D".

Dave Morgan  
Global Product Manager, Hydrochloric Acid
