Subject: Detrex Corn Free Statement

To whom it may concern,

Detrex Chemicals hydrochloric acid products are made using a direct synthesis process using only high purity hydrogen, chlorine and DI water. The hydrochloric acid product from our process is chemically pure with very few trace contaminants or elemental impurities.

No corn or corn byproducts are used in the production of hydrochloric acid nor is any corn or corn byproducts added. Detrex Chemicals hydrochloric acid is processed, stored, and packaged in a closed system that uses no grease or lubricants containing corn or corn byproducts.

To the best of our knowledge corn is not used, found, or added to any of the precursor chemicals used to make hydrochloric acid in our process. Detrex Chemicals hydrochloric acid products are corn free.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is written in a cursive style with a large, looped initial "D".

Dave Morgan
