Subject: Detrex Perfluorinated Chemicals (PFCs) Statement

To whom it may concern,

Hydrochloric acid is a chemical compound that exists as a liquid at normal storage conditions. It is not a wearable item and is not treated for water repellency or stain resistance. Perfluorinated chemicals are not used in the manufacture or packaging of hydrochloric acid and are not added by Detrex Chemicals. While we do not routinely test for these compounds, to the best of our knowledge we have no reason to suspect they may exist in our hydrochloric acid products.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is written in a cursive style with a large initial "D" and "M".

Dave Morgan
Global Product Manager, Hydrochloric Acid
