Subject: Food Contact Packaging Statement

To whom it may concern,

The packaging materials Detrex uses for Food Grade (FCC) products incorporates an integral inner liner, which is the packaging component in contact with the product. The inner liners used by Detrex are manufactured from a grade of virgin HPDE that meets the FDA specification for olefin polymers contained in Title 21 of the Code of Federal Regulations, Section 177.1520(c)(3.2). These regulations stipulate the materials used by Detrex to package our food grade HCl are materials safe for use in articles, or components of articles intended for single or repeated use as food contact substances. Detrex receives and maintains documentation of this conformance of our packaging materials from suppliers of packaging materials used for food grade products.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is written in a cursive style with a large, looped initial "D".

Dave Morgan
