Subject: Detrex Lactose Free Statement

To whom it may concern,

Lactose is a sugar found in milk, and to a lesser extent, in other dairy products. Detrex Chemicals hydrochloric acid products are made using a direct synthesis process using only high purity hydrogen, chlorine and DI water. The hydrochloric acid product from our process is chemically pure with very few trace contaminants or elemental impurities.

Lactose is not used in the production of hydrochloric acid, nor is it added. Detrex Chemicals hydrochloric acid products are processed, stored, and packaged in a closed system that uses no grease or lubricants lactose containing lactose.

To the best of our knowledge, Lactose is not used, found, or added to any of the precursor materials used to make hydrochloric acid. Detrex Chemicals hydrochloric acid products are Lactose free.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is written in a cursive style with a large initial "D".

Dave Morgan
Global Product Manager, Hydrochloric Acid
