Subject: Polyphenol Oxidase (PPO)

To whom it may concern,

Detrex Chemicals hydrochloric acid products are made using a direct synthesis process using only high purity hydrogen, chlorine and DI water. The hydrochloric acid product from our process is chemically pure with very few trace contaminants or elemental impurities.

Detrex Chemicals does not add or use any Polyphenol Oxidase (PPO) compounds or products containing any Polyphenol Oxidase (PPO) compounds to manufacture our products.

To the best of our knowledge, Detrex Chemicals hydrochloric acid products are free of all PPO substances and elements.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is written in a cursive, flowing style.

Dave Morgan
