Subject: Detrex Certificate of Origin Statement

To whom it may concern,

A Certificate of Origin is a document used in international trade. It is a printed document completed by the exporter or agent, and certified by an issuing body, that attests which country the material in a specific export shipment has been manufactured or processed.

Detrex Chemicals hydrochloric acid products are only made in the United States at our Ashtabula, Ohio facility. A certificate of origin can be provided upon customer request and is part of the Detrex Chemicals shipping process for all international shipments of our products.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is written in a cursive style with a large, looped initial "D".

Dave Morgan
Global Product Manager, Hydrochloric Acid
Detrex Chemicals
