Subject: Detrex Bromine and Chlorine Based Compounds Statement

To whom it may concern,

Most Bromine and Chlorine based compounds, such as Pentabromodiphenyl ether, or 2-chloroisopropyl phosphate are used primarily as flame retardant compounds. These compounds are not used by Detrex in the production and packaging of hydrochloric acid. While we do not routinely test for these compounds, to the best of our knowledge we have no reason to suspect they may exist in our hydrochloric acid Products.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is written in a cursive style with a large, looped initial "D".

Dave Morgan
