Subject: Detrex Substances of Very High Concern (SVHC) Statement

To whom it may concern,

These are chemical substances, or elements or components of a chemical substance, which are subject to regulation under the European Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) regulations. SVHC regulated substances are those which have potential negative impacts on human health and the environment.

Detrex Chemicals hydrochloric acid products are made using a direct synthesis process using only high purity hydrogen, chlorine and DI water. The hydrochloric acid product from our process is chemically pure with very few trace contaminants or elemental impurities. We do not add or use any SVHC compounds or products containing any SVHC compounds to manufacture our products. Detrex also does not use any packaging containing any SVHC compounds or components containing SVHC elements. To the best of our knowledge Detrex Chemicals hydrochloric acid products are free of all SVHC substances and elements.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is written in a cursive style with a large, looped initial "D".

Dave Morgan
