Subject: Detrex Ethylene Oxide (ETO) Free Statement

To whom it may concern,

Detrex Chemicals hydrochloric acid products are made using a direct synthesis process using only high purity hydrogen, chlorine and DI water. The hydrochloric acid product from our process is chemically pure with very few trace contaminants or elemental impurities.

Detrex Chemicals does not add or use any Ethylene Oxide (ETO) compounds or products containing any Ethylene Oxide (ETO) compounds to manufacture our products.

To the best of our knowledge, Detrex Chemicals hydrochloric acid products are free of all ETO substances and elements.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is written in a cursive style with a large initial "D".

Dave Morgan
Global Product Manager, Hydrochloric Acid
